With millions of us living in cities and busy towns, it is essential to ensure your skincare routine protects your skin from everyday stressors which are a part of urban life!

Our skin is the first line of defence from the environment and when it is intact, it protects us from any foreign substances such as bacteria or pollution.

3D Hydro₂ facial is an excellent treatment that consists of technologies that can support skin barrier repair.

The Hydro Peel technology removes dead skin cells, regulates cell turnover and encourages an increase in microcirculation.

Other technologies such as oxygenation, electro ion and ultrasound effectively increase the infusion of products containing natural moisture factors (NMFs), such as hyaluronic acid, into the deeper layers of the epidermis.

The hot and cold plates of the Fire and Ice facial encourage the skin to produce heat shock proteins to help strengthen the epidermis layer.

Speak to a member of our team today to find out more about how you can improve your skin with 3D Hydro₂ facial!
